

## Be in the Green in Twp of Howell:

NJ Direct Install Program addresses lighting, heating, cooling and ventilation (HVAC), refrigeration, motors, natural gas and variable frequency drives.

*In 2010, over 160 commercial buildings in NJ took advantage of the Direct Install Program. On average, they did a \$35,800 project. The project received a \$24,500 state subsidy that saved them 30,500 kWh of electricity and 275 therms of gas energy annually. This translated into a savings of \$6,400 annually for these businesses.*

**SAVE 70%  
TO UPGRADE OR  
REPLACE YOUR  
CURRENT:  
Furnace, Boiler, Central  
Air Conditioning System  
or Lighting Systems**

*Over the past year, The Township of Howell joined the Sustainable Jersey movement to become a certified “Green” community.*

*Through this opportunity, the Township decided to assess the energy use in City Hall and find ways to reduce energy consumption and operating costs. In doing so, the State is offering many financial incentives to accomplish this task and make the necessary upgrades and improvements.*

*While researching the program for the municipality, we came across a similar program that extends to commercial property owners and business owners. So, the Township is partnering with Sustainable Jersey and the New Jersey Board of Public Utilities to offer the same incentives to you. .*

*“Be In The Green Twp. of Howell– Direct Install” begins with an initial, absolutely no obligation, FREE energy assessment of your building by a local licensed contractor.*

*Once completed, you have the option to choose any of the upgrade energy/reduction suggestions made in the assessment and the program (State) will pay up to 70% of the upgrade cost.*

## It just takes six easy steps:

1. **Contact** our local participating contractor to schedule an appointment for a FREE energy assessment
2. **Review Results:** After the energy assessment, the contractor will review the results with you, including what measures qualify and your share of the project cost.
3. **Move Forward:** You will sign a scope of work document with the contractor to proceed with implementation of qualifying measures.
4. **Arrange Installation:** You and the contractor will set a convenient start date for the installation.
5. **Confirm Installation:** Once the contractor completes the installation, you accept the work by signing a project completion form.
6. **Complete Transaction:** You pay the participating contractor your share of the project cost and NJ’s Clean Energy Program pays the rest.

## Benefits:

1. **Turnkey Process:** The local Contractor addresses your project from start to finish.
2. **Minimal Cost:** Your share of the project’s cost will be approximately 30%, the program pays the remaining 70% not to exceed \$107,000.
3. **Fast Turnaround Time:** Project installations are typically completed within 90 days from the time of scheduling your energy assessment.
4. **On going Savings:** Your new energy-efficient equipment will provide savings for years to come through dramatically reduced energy costs on your monthly utility bills.
