

# Monmouth County Case Management Program

Through the **Monmouth County Case Management Program (MCCMP)**, RWJBarnabas Health Institute for Prevention and Recovery offers case management and recovery support services for individuals with substance use disorder and/or mental health diagnoses. This county-funded pilot program addresses issues such as housing, finances, transportation, legal services, employment, health care and family needs.

## **Case Managers working with MCCMP collaborate with IFPR Peer Recovery Specialists to:**

- ▶ Develop an individualized plan that include a coordination of care, strategies for recovery and connections to community resources.
- ▶ Provide training to individuals about recognizing triggers to develop strategies to avoid relapse.
- ▶ Serve as key resources of support and guidance throughout each individual's recovery journey.
